

ACQUA TOP

Acqua Top is the new countertop purifier that dispenses pure, natural, cold and sparkling water.

Acqua Top can be connected to the mains water supply or used with the supplied tank, eliminating any need for installation.

Acqua Top is even more efficient and quieter.

Thanks to its new features, it is really easy to use.

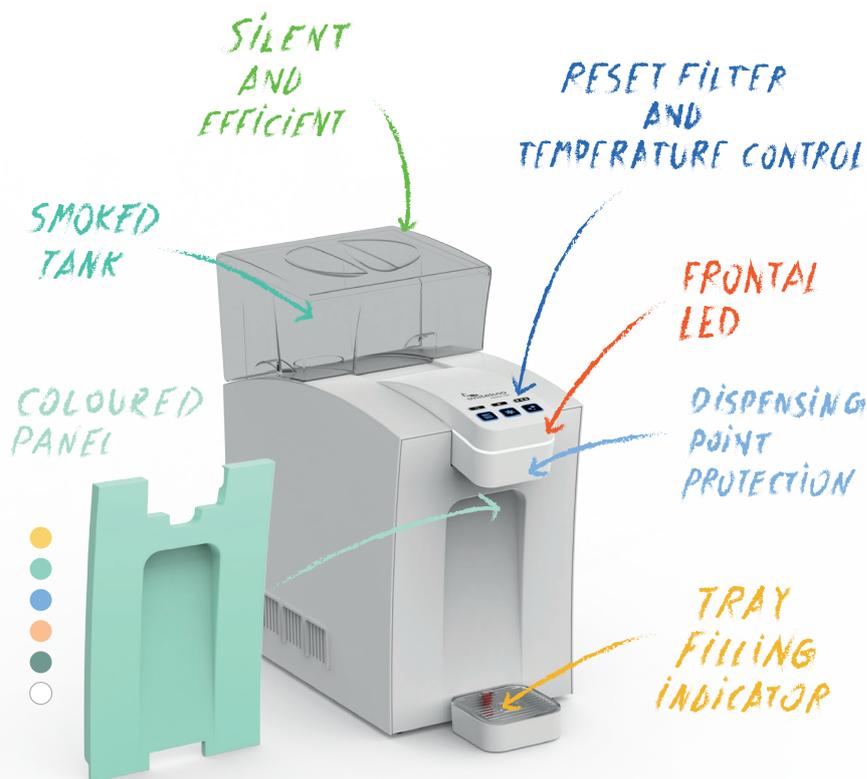

A single button is all you need to reset the filter and control the temperature.

The drip tray indicates when it is too full, while the front LED shows the status of the appliance.

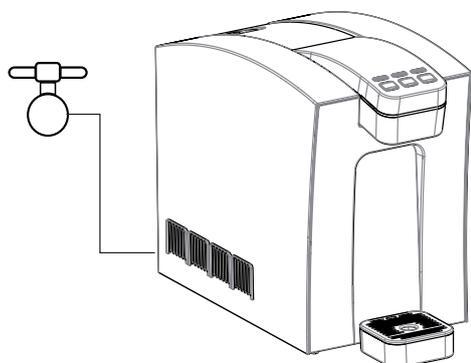

The smoked tank and white colour ensure a modern and elegant design.

The coloured panels allow you to match it to any environment and style.

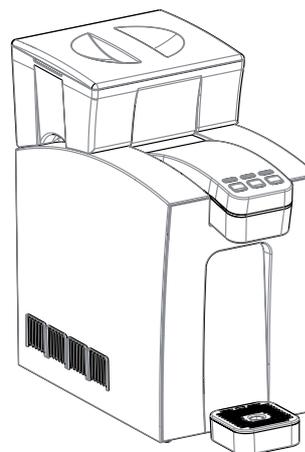

Configurations

With water supply connection

With tank

Technical Details

Supply tension (V)	230
Supply frequency (Hz)	50
Max H ₂ O inlet pressure (kPa)	450
Max CO ₂ inlet pressure (kPa)	450
Protection degree against solid and liquid penetration	IP20
Water main supply	Yes
Room temperature water (l/h)	120
Cold water (l/h)	12
Sparkling water (l/h)	12
Continuous dispensing	Yes
Water temperature regulation	3 levels of regulation
Carbonator type	Carbonator

Carbonator material	Stainless steel AISI 316L
Carbonator capacity (l)	3,5
Pump type	Booster
Compressor type	Reciprocating
Compressor capacity (cc)	3,6
Refrigerant type	R600a
Filter on board	KW802S
Filter type	Activated carbons with silver ions
Filtration rating (µm)	0,5
Filter alarm	Yes
Overall dimensions of the machine body (L;P;H) [mm]	236 X 494X 465
Weight of the machine body [Kg]	16,5
Length of the power cord [m]	2
